Title:

CEO Master Dashboard & Business Insights – ApexFlow Systems

Include:

Company: ApexFlow Systems (B2B SaaS)

Objective:

Design a CEO dashboard that shows company health and highlights where leadership should act this week.

Approach:

- Selected only the most decision-critical KPIs
- Connected insights across departments
- Designed an automated reporting flow
- Focused on decisions, not reporting

APEXFLOW SYSTEMS - CEO MASTER DASHBOARD

MRR
₹78 L

Pipeline
₹8.1 Cr

Churn
6.8%

Runway
11 Months

Department	KPI	Value	Trend	Status	Why
Sales	Win Rate	16%	↓		Higher conversion increases revenue
Marketing	SQL Conversion	27.70%	→		Better lead quality improves sales
Product	MAU	1150	↑		Measures product engagement
Product	Critical Bugs	14	↑		Bugs increase churn
Customer Success	Churn	6.80%	↑		Reduces recurring revenue
Customer Success	At-Risk Accounts	11	→		Prevent future churn
Finance	MRR	₹78 L	↑		Indicates business growth
Finance	Runway	11 Months	↓		Indicates financial sustainability
HR	Attrition	18%	↑		High attrition affects productivity
Operations	Manual Reports	27	↑		Manual work slows decisions

CEO PRIORITIES THIS WEEK

- ✓ Improve Win Rate
 - Win rate fell from 23% to 16%
- ✓ Reduce Churn
 - Protect recurring revenue
- ✓ Fix Critical Bugs
 - Improve customer experience
- ✓ Reduce Burn Rate
 - Extend cash runway
- ✓ Automate Reports
 - Reduce manual effort

Metric Explanation

Department	KPI	What it Shows	Why CEO Cares	Decision Enabled
Sales	Win %	Percentage of opportunities won	Higher conversion increases revenue	Improve pricing or sales process
Marketing	SQL Conversion Rate	Quality of marketing leads	Better lead quality improves sales	Allocate budget to better-performing channels
Product	MAU	Active users	Measures product engagement	Improve product adoption
Product	Critical Bugs	Number of critical issues	Bugs increase churn	Prioritize bug fixes
Customer Success	Churn	Customers leaving	Reduces recurring revenue	Improve retention
Customer Success	At-Risk Accounts	Customers likely to leave	Prevent future churn	Target retention efforts
Finance	MRR	Monthly recurring revenue	Indicates business growth	Increase revenue through sales and retention
Finance	Runway	Months company can operate with current cash	Indicates financial sustainability	Control costs or raise funds
HR	Attrition	Employees leaving	High attrition affects productivity	Improve retention strategies
Operations	Manual Reports	Number of manual reports	Manual work slows decisions	Automate reporting

Weekly CEO Insights

Sl.No.	Insight	Departments	CEO Action
1	Sales pipeline is growing, but Win % has declined from 23% to 16%, suggesting lead quality or sales conversion issues. Prioritize high-converting marketing channels and review the sales process.	Sales + Marketing	Improve lead quality and sales execution
2	High critical bugs may be contributing to 11 at-risk accounts and a 6.8% churn rate. Prioritize fixing critical issues before releasing new features.	Product + Customer Success	Fix critical bugs
3	Customer churn is reducing recurring revenue while the company has an 11-month runway. Focus on customer retention to protect MRR and improve financial stability.	Customer Success + Finance	Strengthen retention programs
4	High employee attrition may impact product quality and contribute to unresolved critical bugs. Improve retention and fill key engineering roles.	HR + Product	Reduce attrition and hire critical talent
5	Preparing 27 manual reports each month slows decision-making across departments. Automate reporting through a centralized CEO dashboard to improve efficiency.	Operations + All Departments	Automate reporting

Automation & Data Flow

Data Refresh & Ownership

Department	Data Source	Refresh	Owner
Sales	CRM (Salesforce/HubSpot)	Hourly	Sales Operations
Marketing	Google Ads, LinkedIn, GA4	Hourly	Marketing Team
Product	Jira / Product Database	Every 30 Minutes	Product Team
Customer Success	Zendesk / CS Platform	Daily	Customer Success
Finance	ERP / Accounting	Daily	Finance Team
HR	HRMS	Daily	HR Team

Revenue Predictability

Problem Statement

Sales pipeline is growing, but the win rate has declined from 23% to 16%, making future revenue forecasts less predictable. Although more opportunities are entering the pipeline, fewer deals are being converted into revenue.

Metric	Current Status
Pipeline	Increasing
Closed Won	Decreasing
Win Rate	16% (↓ from 23%)
SQLs	Stable
MRR	Below Target
ARR	Growth Slowing

Root Cause Analysis

- Marketing is generating enough leads.
- Sales pipeline is healthy.
- Lead quality needs improvement.
- Sales conversion rate is declining.
- High-value opportunities are not closing consistently.

CEO Actions (Next 30 Days)

- Redefine SQL (Sales Qualified Lead) criteria.
- Audit lost opportunities to identify common reasons for failure.
- Provide additional coaching to the sales team.
- Shift marketing budget to the highest-performing channels.
- Review revenue forecasts and win rates every week.
